INTRODUCTION

This is the first Provincial Student Practice Education Metrics Report that provides student practice education metrics across British Columbia. The intent of the report is to:

- Acknowledge and celebrate the commitment of those who support student education
- Recognize collaborations amongst placement settings and academic partners across the province
- Provide data to inform operational and strategic decisions, including workforce planning, building capacity for student education, quality practice environments, and priority areas of focus and innovation
- Identify opportunities for further development

STUDENT PRACTICE EDUCATION IN BRITISH COLUMBIA

Student Practice Education in British Columbia includes the learning activities that occur in health settings for students who are enrolled in a recognized academic institution who have a practicum as part of their program requirements.

Preparing the healthcare team members of tomorrow is possible because of the support and commitment from many people in a wide variety of roles in both the health and education sectors, as well as with provincial partners. Oversight is provided by the Planning Board for Health and Medical Education, with representation from the BC Ministry of Post-Secondary Education and Skills Training, and the BC Ministry of Health. The post-secondary institutions and the health organizations have adopted a collaborative approach to sharing the responsibility for delivering the clinical component of the students' education program as outlined in the Provincial Student Practice Education Policy (<https://spe.healthcarebc.ca/Documents/2022%20SPE%20Policy%20-%20For%20Distribution.pdf>)

The BC SPE Network is comprised of partners from the Ministry of Health, Ministry of Post-Secondary Education and Future Skills, Post-Secondary Institutions, and Health Care Organizations. The SPE Network also includes the contributions from other groups, such as BC Health Regulators, professional associations, research networks, and subject matter experts.

This report is structured based on the Indicators identified in the Provincial Student Practice Education Metrics Framework (Appendix A). As this report is shared with partners, feedback will be gathered on both the content of the metrics included and the structure of how the information is organized and will be used to inform any future reports.

STUDENT PRACTICE EDUCATION ACTIVITY DATA – LIMITATIONS AND OPPORTUNITIES

The Health Sciences Placement Network, or HSPnet, provides a web-based system for managing practice education in the health sciences and serves as the source of data for this report. Used across Canada and internationally since 2003, HSPnet provides a rich database and tools to support practice education. As this is the first report of its kind, there are a few caveats to be named:

- There is likely some variation in the data elements and usage of HSPnet across health organizations, disciplines, and post-secondary institutions. This report provides an opportunity for closer examination, discussion, and possibility for establishing more consistency (where appropriate) in the data and usage of the platform.
- As such, the intent of this report is to build an understanding, transparency, and foster dialogue – one should be cautious about drawing any firm conclusions without further inquiry from respective partners.

- Because HSPnet is a rich data repository for student activities, there are choices in the data selected and presented here as an example of what is possible to guide planning and decision-making. Further stakeholder engagement of meaningful measures will follow.

Medical students are also part of the clinical placement activities across the province. At this time, not all health organizations have medical learner placement information available in HSPnet. Work is underway to include Medical Undergraduates (MDUG) data in HSPnet across the province and will be considered for future reports.

The Midwifery program at the University of British Columbia is transitioning to HSPnet in the 2022-23 Fiscal Year. Therefore, midwifery student placement data is provided directly from UBC and is included separately in Appendix D, Table 5. Future provincial metrics reports will include midwifery student placement data from HSPnet in the table with the other sub-disciplines.

Similarly, First Nations' Health Authority (FNHA) also supports student practice education activities in a variety of ways across the province. As FNHA is in the process of transitioning to use HSPnet for student placement coordination, data that reflects their role with students will be available in future updates.

BC Emergency Health Services (BCEHS) is also transitioning onto HSPnet. Reporting of placement data for paramedics in health authorities is under the discipline of Emergency Medical Technology in health authority data. In this report data for BCEHS on-car paramedic student placements is in the Appendices only (Table 4).

Lastly, metrics tell an important but only partial story of the journey of health program students becoming new team members in the health system. There is opportunity to expand the report beyond activity metrics to include measures that indicate students' learning experiences in the clinical environment and the opportunities provided to develop and demonstrate relevant competencies.

STUDENT PRACTICE EDUCATION DATA WORKING GROUP (SPEDWG)

The Student Practice Education Data Working Group was established to:

- Provide leadership for gathering, tracking and reporting on student placement information across BC.
- Oversee the applied use of the Student Practice Education management software (HSPnet).
- Promote effective utilization of student placement data.
- Provide advice and recommendations to the HSPnet National Alliance through the HSPnet-BC Lead Agency and/or the HSPnet Operational Team on student practice education practice and operations that could be supported by data and analytics.
- The SPEDWG is accountable to the Provincial Student Practice Education Coordinating Committee (PSPECC).
- The SPEDWG is comprised of representatives from post-secondary institutions, health care organizations, the Ministry of Post-Secondary Education and Future Skills, the Ministry of Health and the HSPnet Team. The Working Group has rotating Co-Chairs from different sectors, with PHSA serving as the Working Group Secretariat. The SPEDWG launched in January 2022 and is currently meeting monthly.

DATA STEWARDSHIP PRINCIPLES AND APPROACH

Student Practice Education Data Stewardship Principles:

- Each HSPnet-user organization has full access to their own organization's data at all times and may use it and share it as determined by their organization.
- SPEDWG will support the collective stewardship of aggregate provincial data as an asset of the health system.

Approach for requests for provincial data:

- Aggregate provincial data is available to the SPEDWG members via the BC Provincial Report Card (past 4 years of data).
- Analysis, monitoring, and sharing of data to wider stakeholders will be done in consultation with each sector (Health, Education, Government).
- As consistent parameters for answering common data queries are being documented and agreed upon, any interpretation of provincial data will be done in consultation with each sector.
- Aggregate provincial data shall be made available to wider stakeholders to assist with improved planning and coordination.

Note: Aggregate provincial data does not include unique individual (student, instructor, preceptor) information or identifiers.

DATA-INFORMED PLANNING

As stated above, two of the overall intentions of creating and providing this provincial student education metrics report are to provide data to inform operational and strategic decisions, including workforce planning, building capacity for student education, quality practice environments, and priority areas of focus and innovation; and to identify opportunities for further development. It is intended that taking time each year to look back and review the activities that have occurred as well as consider the changing contexts of our health system and develop a collaborative plan for the year ahead will be beneficial for delivering clinical placement opportunities that are well-aligned with the needs of British Columbians and our health system.

STUDENT PRACTICE EDUCATION INFOGRAPHIC

Below is the overall activity by hours and number of student placements. It highlights activities between post-secondary institutions and BC health authorities using HSPnet to coordinate student placements.

FISCAL
YEAR
2021-22

STUDENT PRACTICE EDUCATION in British Columbia

32,317

Total number of student placements, excluding medical students and residents, at BC Health Authorities (in FY 20-21 it was 27,023)

STUDENT PLACEMENTS

45 BC schools placing in 6 health authorities

HOURS

4,786,642

Total number of Students Practice Education Hours, excluding medical students and residents, at BC Health Authorities (in FY 20-21 it was 4,272,722)

66%

Percentage of requests resulting in Confirmed placements (in FY 20-21 it was 55%)

92

Number of sub-disciplines placing students in BC Health Authorities

*In-hospital paramedic activity only, on-car activity is in Appendix D, Table 4.

The number of distinct students (22 683) by discipline and sub-discipline by month for the province is seen in Table 2, allowing one to see at a glance the types of students and volumes that have been supported throughout the last fiscal year.

This data can be used to:

- Anticipate student volumes by discipline throughout the calendar year.
- Plan for students in advance, including support for the planning required for preceptor assignment, development, and availability.
- Schedule students learning activities such as on-site training, and interprofessional collaborative practice events and learning opportunities.

Note: since the length of student placements vary, the students listed in one month may still be on-site in subsequent months; excluded from these graphs are medical students and on-car paramedic placements whose current policies result in an equal distribution of placements throughout the year.

MONITOR PLACEMENT COORDINATION EFFICIENCY

The following chart provides the request activity for all disciplines at BC health authorities. This indicates the amount of coordination activity required to result in a confirmed placement. As all required student placements are eventually secured, the cancel and decline requests indicate the overall effort. For example, to secure 9,786 Nursing placements, an additional 2,688 requests were made that were cancelled, and 2,691 requests were made that were declined, for an overall rate of 66%. This metric can be monitored to see if improvements to the placement process also improve coordination efficiency. Coordination efficiency data by sub-discipline can be found in Appendix D.

Figure 1: Placement requests confirmed, declined, or cancelled by Discipline FY 2021 – 22

BUILD PLACEMENT CAPACITY AND INNOVATION

Top 10 Decline and Cancel Reasons

All placement requests (PR) should have a final status in HSPnet. The main status' that are monitored are Confirmed and Accepted (these indicate placements that occurred); and Decline and Cancel (these indicate placement requests that did not occur). A reason is indicated every time a PR is declined or cancelled. Figure 2 lists the top 10 decline and top 10 cancel reasons for all disciplines, placing agencies and receiving agencies in BC. This data leads to follow-up actions by both receiving agencies and placing agencies to improve placement coordination.

Figure 2: Top 10 Decline and Cancel Reasons FY 2021 – 22

APPENDIX A: PROVINCIAL STUDENT PRACTICE EDUCATION ANNUAL METRICS FRAMEWORK

1. Indicator: Monitor Provincial Student Practice Education Activities

This category includes measures that demonstrate level of commitment to students and preceptors across the province over three fiscal years.

- a. # of Students, Placement Hours by Discipline & Sub-Discipline and Receiving Agency
- b. *# of Medical Students (Under-grads and Post-grads)*
- c. *# of placements by status/site regions/disciplines*
- d. # of Confirmed Placement Requests by Month
- e. *# of Preceptors in HSPnet With a Placement/Fiscal Year*

2. Indicator: Monitor Placement Coordination Efficiency

This category includes measures that indicate the efficiency of coordinating student placements across the province over one fiscal year. Given that all students end up with clinical placements, these measures provide data on the proportion of placements that require more than one request.

- a. Rate of placement confirm/cancel/decline by discipline
- b. Number of placement confirm/cancel/decline by sub-discipline

3. Indicator: Build Placement Capacity and Innovation

This category includes measures that address need and capacity for student placements, as well as innovative placement models.

- a. *# of Placement hours/Program/Sub-discipline/Placing Agency*
- b. *# of placement hours/Discipline/Sub-discipline/Receiving Agency*
- c. *# of Inter-professional placement destinations/request status*
- d. *Distribution of Student Hours by Care Setting/discipline*
- e. # of Decline and Cancel by Reason (Top 10 reasons)
- f. *# of Staff Participants in Preceptor/Educator Training*

4. Indicator: Monitor the Quality of the Clinical Learning Environment

This category includes measures for monitoring quality learning environments.

- a. *Evaluation approach TBD*

Note: grey, italicized text represent forthcoming metrics

APPENDIX B: REGIONAL STUDENT PRACTICE EDUCATION METRICS FRAMEWORK

Student Education data will be made available both annually as aggregate provincial data (see Appendix A); and throughout the year to support regional monitoring and decision-making activities at regular intervals (e.g. each term, prior to reply-by timeframes), as outlined below.

Indicator: Monitor Provincial Student Practice Education Activities

This category includes measures that placement requests and status by term.

- a) # of Students, Placement Hours by Discipline & Sub-Discipline and Receiving Agency
- b) *Placement usage by status/site regions/disciplines*
- c) # of Confirmed Placement Requests by Month

Indicator: Monitor Placement Coordination Efficiency

This category includes measures that indicate the efficiency of coordinating student placements across the province over one fiscal year. These measures provide data on the proportion of placements that require more than one request.

- a) Rate of placement confirm/cancel/decline by discipline

Indicator: Build Placement Capacity and Innovation

This category includes measures that address need and capacity for student placements, as well as innovative placement models.

- a) *# of Placement hours/Program/Sub-discipline/Placing Agency*
- b) *# of placement hours/Discipline/Sub-discipline/Receiving Agency*
- c) *# of Inter-professional placement destinations/request status*
- d) *Distribution of Student Hours by Care Setting/discipline*

Indicator: Monitor the Quality of the Clinical Learning Environment

This category includes measures for monitoring quality learning environments.

- a) *Evaluation approach TBD*

Note: grey, italicized text represent forthcoming metrics

APPENDIX C: GLOSSARY

GLOSSARY	
HSPnet DEFINITIONS	
HOURS	
Student Hours	Total number of placement hours for all students (groups and non-groups) for all confirmed placements (calculated as # of students x the number of placement hours requested).
Placement Hours	Total number of hours requested, per student/group for all confirmed placements.
PLACEMENT STATUS	
Cancelled	A Confirmed, Redirected or Accepted Placement Request has been Cancelled by the Placing Agency or Receiving Agency (with reasons).
Confirmed	Represents all accepted requests that are confirmed by the school and agency.
Accepted by Agency	Represents all accepted requests that have not been confirmed by the school. Once a school accepts the placement, it becomes a Confirmed Status.
Declined by Agency	Represents all requests that were officially declined by the receiving agency. The reasons for decline are also captured for this placement status.
OTHER APPLICABLE HSPnet TERMS	
Discipline / Sub-discipline	The classification of the field of study. The list in HSPnet is based on the Classification of Instructional Programs (CIP) codes for education programs. Discipline: General category of Instructional Programs Sub-Discipline: Qualification upon completion of a program
Placing Agency	Typically, a health sciences educational institution that initiates a student placement but can be any organization that places a student (e.g. BCEHS).
Placement Destination	The physical or virtual location in which the student will complete their placement experience (e.g. 6 th floor surgical ward, 2B). A destination is considered “active” if a Destination Coordinator is actively managing the Inbox (accepting/declining).
Receiving Agency/Site	The agency (typically but not necessarily a health services organization) that receives a student placement request. The Receiving Agency represents the legal entity (health authority, private lab, etc.) as opposed to the placement destination or site.
GENERAL TERMS	
Students	Learners who are involved in a Student Education experience as part of their studies in an undergraduate, graduate, post-graduate education program in the health and human services professions. This may include students from non-clinical programs in health services support areas such as information management, human resources, communications and decision support.
Student Practice Education	The component of an educational program in which students learn and practice in a community, clinical or simulated setting. It provides the experiential learning that helps students acquire the necessary skills, attitudes and knowledge to practice effectively in their field. It may include direct contact with patients/clients and access to their personal health information.
Fiscal Years	April 1, 2019 – March 31, 2020 April 1, 2020 – March 31, 2021 April 1, 2021 – March 31, 2022

APPENDIX D: DATA TABLES

Table 3 reports the number of placement requests throughout the year and the percentage of the total requests. For 2021-22, 66% of requests were confirmed and 34% of requests did not result in a placement.

Table 3: Total # and % of Placements Request status all Disciplines by Fiscal Year

Request Status	FY 19 - 20		FY 20 - 21		FY 21 - 22	
	% of requests	# of requests	% of requests	# of requests	% of requests	# of requests
AccA	0.26%	60	0.56%	138	0.19%	49
AccD	0.00%		0.00%		0.00%	1
Canc	14.74%	3,439	24.68%	6,044	17.51%	4,432
Conf	65.48%	15,272	54.02%	13,229	65.83%	16,658
DecA	19.07%	4,447	20.07%	4,915	15.70%	3,973
New	0.37%	86	0.56%	137	0.58%	146
Redir	0.07%	16	0.10%	25	0.17%	42
Sent	0.01%	3	0.01%	2	0.02%	4
Grand Total	100.00%	23,323	100.00%	24,490	100.00%	25,305

ACTIVITY AT BC HEALTH AUTHORITIES AND ALL OTHER RECEIVING AGENCIES

Figure 3 depicts the number of confirmed placements at BC health authorities and all other receiving agencies. There are roughly 50 non-health authority receiving sites included in the placement numbers below for sites such as post-secondary clinics, affiliated and private long-term care, community pharmacies, and some private clinics. Placements that occur at receiving sites that are not documented in HSPnet are not included.

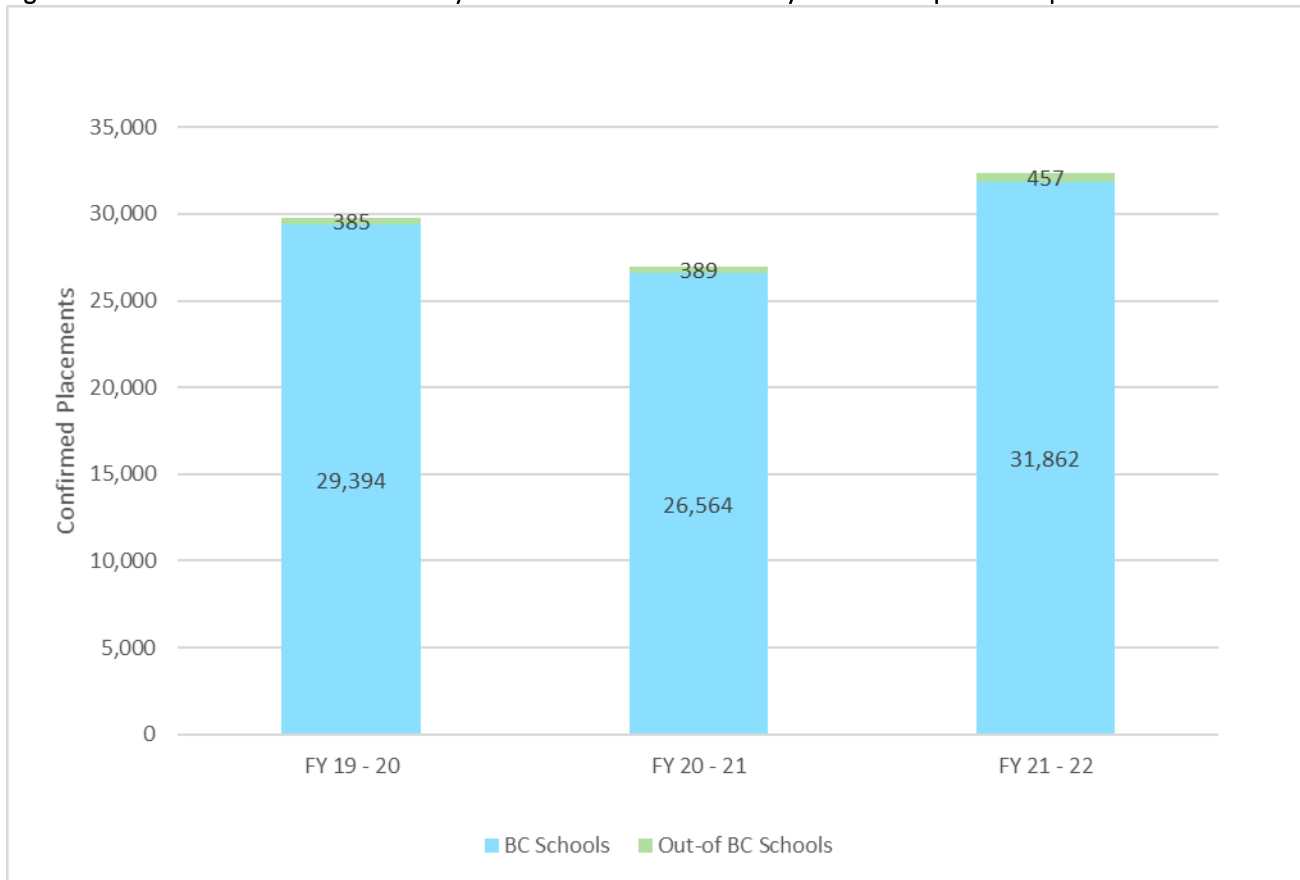

Figure 3: Confirmed activity at HAs and All Other Receiving Agencies for 3 years

ACTIVITY FROM POST-SECONDARY INSTITUTIONS OUTSIDE BC

The Figure 4 depicts the number of confirmed students on placements at BC health authorities from post-secondary institutions outside of BC over the last three years. This does not include medical learners.

Figure 4: Number of Student Placements by in-BC and Out-of-BC schools by FY – All Disciplines except Medicine

MONITOR PLACEMENT COORDINATION EFFICIENCY BY DISCIPLINE

The following charts provide the request activity for the top 10 disciplines with further breakdown by sub-disciplines at BC health authorities. This indicates the amount of coordination activity required to result in a confirmed placement. As all required student placements are eventually secured, the cancel and decline requests indicate the overall effort. This metric can be monitored to see if improvements to the placement process also improve coordination efficiency. Coordination efficiency data by discipline can be found in Figure 1.

Figure 5: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Nursing

Figure 6: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Other Health

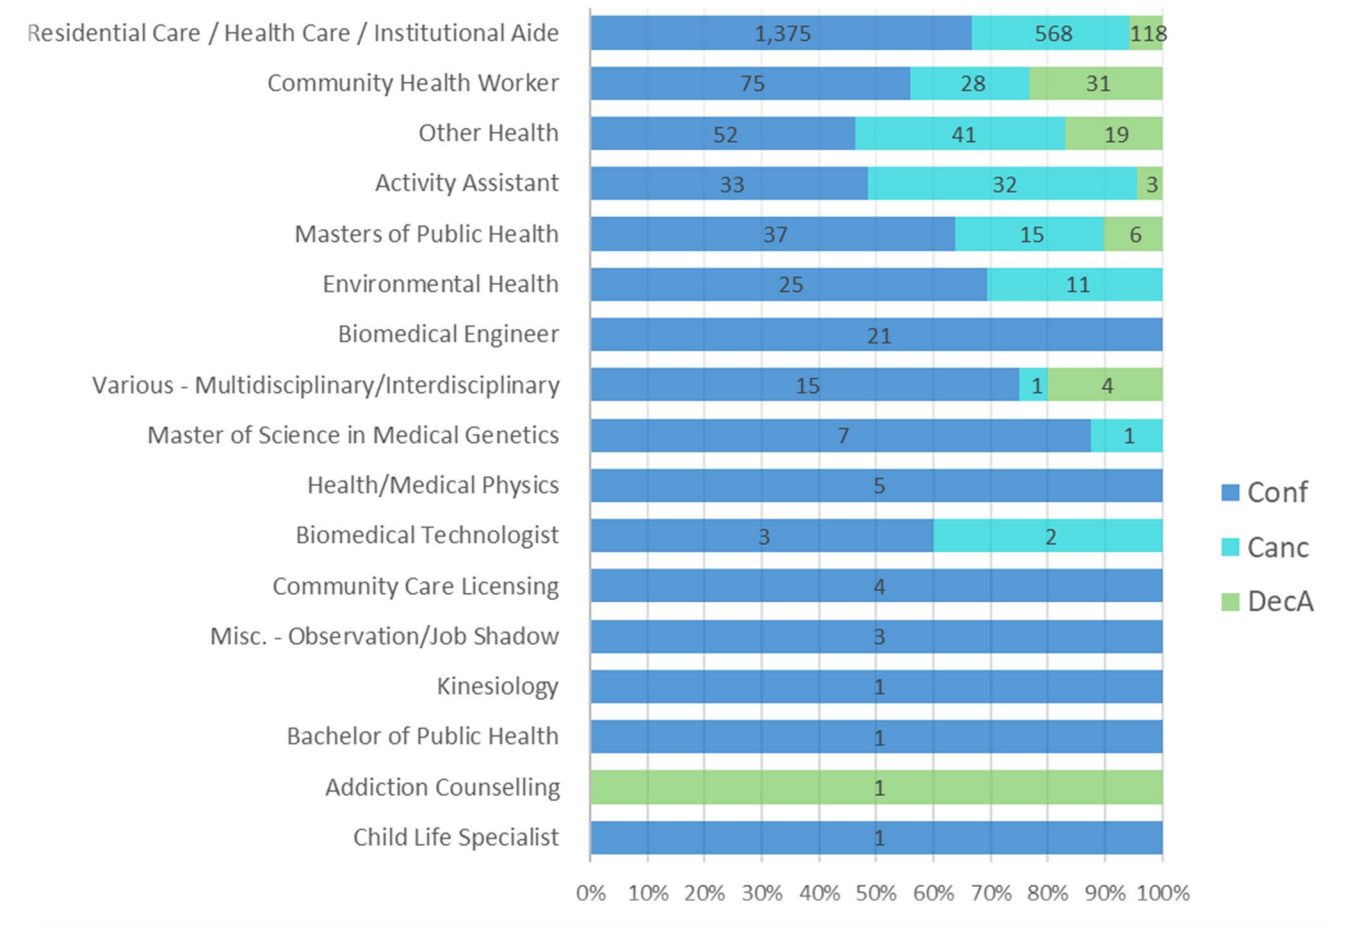

Figure 7: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22:
Technologists/Technicians

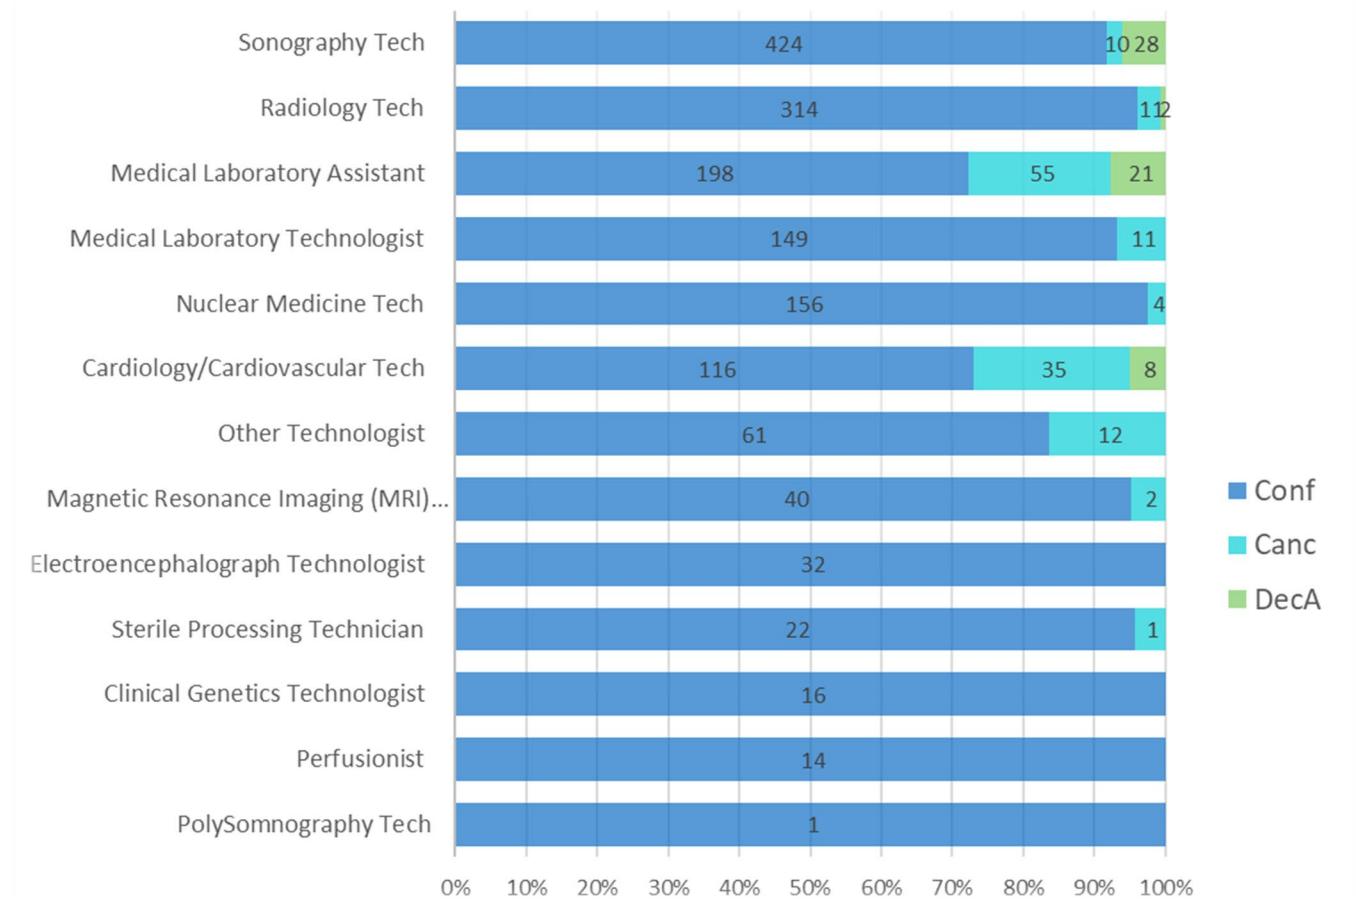

Figure 8: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Rehabilitation Sciences

Figure 9: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Administration

Figure 10: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Pharmacy

Figure 11: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Social Work

Figure 12: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Psychology

Figure 13: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Therapists

Figure 14: Requests confirmed, declined, or cancelled by Discipline and Sub-discipline FY 2021 – 22: Non-health

The remaining Disciplines have fewer than 100 requests.

ACTIVITY FOR BC EMERGENCY HEALTH SERVICES

Tracking of paramedic student activity at the BC Emergency Health Services for on-car practicums is transitioning to HSPnet. The table below indicates detailed regional information provided through HSPnet for 2021-22. Note that the total for the number of distinct students does not represent the sum of the data by region due to the same student having placements in more than one region. Reporting of paramedic placements in health authorities is under the discipline of Emergency Medical Technology in health authority data.

Table 4: Total # of Student Hours and Students by Region for FY 2021 - 22

Discipline/Sub-discipline/Region	Student Hours	# Students
Paramedic	61,668	439
Primary Care Paramedic - on-car	55,476	403
BCEHS – all regions		
LwrMainld	28,980	256
Interior	12,672	124
VanIsland	11,916	123
Northern	1,908	24

APPENDIX F: STUDENT PRACTICE EDUCATION DATA WORKING GROUP MEMBERSHIP

This report was developed with the oversight and contribution of the BC Student Practice Education Data Working Group (SPEDWG). The following is the membership for 2022/23:

Ministry

Alyssa Amit, Senior Policy Analyst, Ministry of Post-Secondary Education and Future Skills
Melody Chilibeck, Senior Policy Analyst, Ministry of Health: Allied Health Policy Secretariat
Peter Rudiak-Gould, Senior Policy Analyst, Ministry of Health: Nursing Policy Secretariat
Brendan King, Senior Policy Analyst, Ministry of Health: Workforce Planning

Health Authority

Stacey Pickering, Regional Manager, Student Practice Education, Education & Development, Northern Health
Kathy Scarborough, Director, Learning Strategy and Innovations, Fraser Health
Victoria Skryabina, Business Analyst, Student Practice Education, Vancouver Coastal Health
Andrea Taylor, Manager, Professional Practice, Island Health
Chris Olesen, Coordinator, Clinical Student Placement, Interior Health

Post-Secondary Institutions

Treena Cardiff, Associate Dean, Diagnostics Program, BCIT
Donna Drynan, Associate Head Fieldwork & Clinical Affairs; Dept of OT, Faculty of Medicine, UBC
Lisa Gold, Practice Education Coordinator, College of the Rockies
Patricia O'Hagan, Dean, Faculty of Health and Human Services, Vancouver Island University
Angela Wolff, Associate Professor, School of Nursing, Trinity Western University
Gwen Keeler, Senior Lab Instructor III, Academic Lead Clinical Placements, School of Nursing, UNBC

Secretariat

Christie Diamond, Corporate Director, Academic Education
Sarah Titcomb, Coordinator, Academic Development
BJ Gdanski, Corporate Director, HSPnet

For questions regarding this Report, please email the Student Practice Education Data Working Group via Studenteducation@phsa.ca.

APPENDIX G: REPORT DEVELOPMENT PROCESS

Below depicts the key activities for developing the Provincial Metrics Report and engaging with stakeholders.

Figure 15: Development of Metrics Report

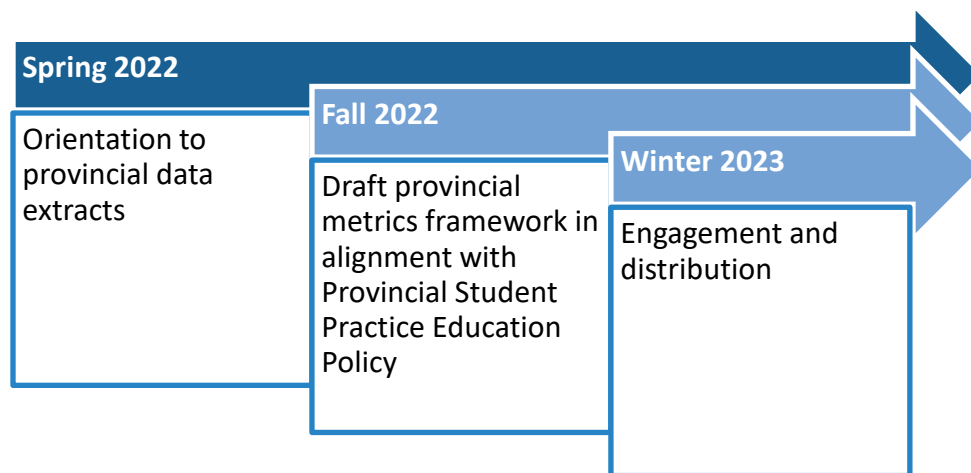

Figure 16: Metrics Engagement

Engagement details

Virtual Sessions:

- Provincial Student Practice Education Coordinating Committee, November 28, 2022
- BC SPE Planning & Coordination sessions, February 23 and March 7, 2023
- Provincial Receiving Coordinators, February 22, 2023

Feedback:

- Checkbox Survey and Zoom polls

Publish:

- Report posted on: <https://spe.healthcarebc.ca/Pages/Resources-and-Tools.aspx>
